Numbers of Different Types of Detail_type

Detail_type	Count
Combined Processing	97
Format Conversion: Data Assemble	83
Format Conversion: Component AdaptionPre	74
Format Conversion: Component AdaptionPost	69
Semantic Transformation: Component Ouput Refinement	61
Format Conversion: Data Extraction	53
Validation: Empty Value Detection	45
Semantic Transformation: Component Input Filter	39
Format Conversion: Data Type Conversion	37
Semantic Transformation: Feature Construction	35
Validation: Domain Specific Validation	34
Component Ouput Selection	30
Format Conversion: Add default value	28
Semantic Transformation: Feature Transformation	18
Format Conversion: Feature Decoding	17
Format Conversion: Data Padding	16
Format Conversion: Vector Shape Conversion	15
Semantic Transformation: Generate config value	13
Validation: Component Specific Validation	10
Validation: Environment Validation	10
Format Conversion: Batch Data	10
Semantic Transformation: Component Ouput Filter	8
Semantic Transformation: Data Balance	7
Semantic Transformation: RankPre	5
Validation: Config Validation	5
Semantic Transformation: Data split	4
Semantic Transformation: Data Scale	4
Semantic Transformation: RankPost	4
Format Conversion: Feature Encoding	2
Semantic Transformation: Data sample	1
Semantic Transformation: Data shuffle	1
Format Conversion: Debatch Data	1
Format Conversion: Data Remove Padding	1
